# Highlights

## IPL technology

Philips Lumea uses an innovative light-based technology called IPL (Intense Pulsed Light), derived from the technology used in professional beauty salons. Philips has adapted this technology for effective use in the safety and comfort of your own home. Philips worked closely with skin experts to develop this technology. For more than 10 years Philips carried out extensive consumer research on IPL technology with more than 2000 women.

## Enjoy smooth skin every day

Philips Lumea applies gentle pulses of light to the hair root. As a consequence, the amount of hair your body grows gradually decreases. Repeating the treatment leaves your skin beautifully hair free and touchably smooth.

## Effortlessly effective

Clinical results after treatment: example 1 (leg)

Clinical results after treatment: example 2 (bikini line)

Our clinical studies have shown significant hair reduction in as little as four fortnightly treatments resulting in smooth hair free skin. To maintain these results, simply repeat the treatment when needed. Time between

treatments may vary based on your individual hair regrowth. - To enlarge this picture, please click on the image in the image gallery on the top of this page

## Suitable hair and skin types

Philips Lumea works effectively on (naturally) dark blonde, brown and black hairs. As with other light-based treatments, Philips Lumea is NOT effective on red, light-blond or white/ grey hair. This product is also NOT suitable for dark skin.

## Application areas

Use with confidence to remove hair on face (upper lip, chin ) and body parts including legs, arm pits, bikini area, belly and arms.

## Skin Tone Sensor

For extra safety the integrated skin tone sensor measures the treated skin complexion

at the beginning of each session and occasionally during the session. If it detects a skin tone that is too dark for this product it will automatically stop emitting pulses.

## Gentle treatment

Gentle to your skin

## Smallest and lightest Lumea

The Philips Lumea Essential is the smallest and lightest in the Lumea range. It is easy to hold and easy to reach all the areas you want to treat.

## No replacement parts needed

Philips Lumea is a complete solution that comes ready to work right out of the box. More importantly, it does not require any replacement lamps or gels.

# Specifications
